

To whom it may concern, I am writing to express my sincere appreciation for our students' collaborative and enriching experience while working with Natalie Beard through the Ubuntu Initiative.

As the Head of Community Service at The American School of Barcelona, I regularly engage with various NGOs so our students can actively participate in meaningful causes. However, working with Ubuntu, specifically Natalie, has been a standout experience.

Natalie transcends the role of a typical NGO representative; she emerges as a true mentor for our students. Under her guidance, the Ubuntu Initiative facilitated a seamless and impactful process for a campaign supporting a foundation in Kenya that works closely with schools.

Throughout the project, Natalie adeptly led our students through a comprehensive journey. They engaged with their peers by sharing insights and experiences, conducted an insightful and creative art class online for children in Kenya, and successfully culminated the project with a fundraising event.

Natalie's consistent support and mentorship made a significant difference. Her commitment to guiding our students in understanding, participating, and contributing to a global cause reflects not only her dedication but also the Ubuntu Initiative's ethos.

As the Head of Community Service, it is genuinely a privilege to collaborate with Natalie and provide our students with such an impactful opportunity for growth, learning, and making a positive impact on the world.

Thank you once again for the collaborative spirit and the transformative experiences provided by the Ubuntu Initiative.

Warm regards,

Marta Vernet  
Head of Community Service and Activities  
The American School of Barcelona
